Computer Science Engineer | Full Stack Developer | Data Analyst

PROFESSIONAL SUMMARY

Computer Science Engineering graduate (CGPA: 8.74) with hands-on experience in full-stack development, REST API development, databases, and web technologies. Skilled in building scalable applications using JavaScript, Python, MERN stack, and SQL with a strong foundation in problem-solving and software development practices.

EDUCATION

- | | |
|--|--|
| Sahyadri College of Engineering and Management, Mangalore (VTU)
<i>Bachelor of Engineering in Computer Science and Engineering</i> | <i>December 2022 – May 2026</i>
CGPA: 8.74 / 10.0 |
| Government PU College Aversa, Uttara Kannada
<i>Pre-University (Class XII) – Science (PCMB), Karnataka State Board</i> | <i>May 2020 – April 2022</i>
Percentage: 85.5% |

TECHNICAL SKILLS

- Languages:** Python, JavaScript (ES6+), SQL, HTML5, CSS3, C, C++
- Frameworks & Libraries:** React.js, Node.js, Express.js, Flask
- Databases:** MongoDB, MySQL
- Tools & Platforms:** Git, GitHub, Postman, VS Code
- Core Competencies:** REST APIs, JSON, Database Modeling, Problem Solving

WORK EXPERIENCE

- Abhimo Technology**
Software Development Intern Jan 2026 – May 2026
 - Developed REST APIs using Node.js and Express.js for core application features.
 - Built and enhanced React.js UI components to improve user experience and responsiveness.
 - Integrated third-party APIs and worked with MERN stack modules for seamless data flow.
 - Performed API testing and debugging using Postman in an Agile development environment.

KEY PROJECTS

- Multimodal Deep Learning Framework for Early COPD Prediction**
Technologies: Python, TensorFlow/Keras, CNN-LSTM, MLP, MFCC, Librosa, Flask, NumPy, Pandas
 - Developed an AI-based diagnostic system integrating spirometry and lung audio data, achieving 98% prediction accuracy.
 - Built and trained CNN-LSTM and MLP models for respiratory audio and clinical data analysis.
 - Deployed the solution as a Flask web application for real-time COPD risk prediction.
 - Preprocessed and optimized datasets to improve model performance and stability.
- Adventure Trekking Platform with Booking & Admin Management System**
Technologies: MongoDB, Express.js, React.js, Node.js, JavaScript, Tailwind CSS, Nodemailer, REST APIs, JWT
 - Developed a full-stack MERN application with Admin and User roles for trek and booking management.
 - Implemented booking workflows with real-time seat availability and automated email notifications.
 - Designed 15+ REST APIs with JWT authentication for secure client-server communication.
 - Optimized MongoDB queries for efficient data handling and performance.
- ERA5 Wind Data Processing Tool**
Technologies: Python, Flask, SQLite, HTML, CSS, JavaScript, xarray, pandas
 - Developed a full-stack web tool to retrieve and process ERA5 wind data from the Copernicus Climate Data Store (CDS).
 - Implemented JWT authentication, API integration, and automated NetCDF/CSV report generation.
 - Built data processing features for wind speed, wind direction, and power density analysis.

CERTIFICATIONS

- Database & SQL Course Completion** | [Certificate](#) Feb 2025
 - Learned database architecture, normalization, advanced SQL, and query optimization techniques.
- Data Analytics Job Simulation (Deloitte Australia)** | [Certificate](#) Oct 2025
 - Applied data analysis skills and created dashboards using Tableau and Excel for business insights.
- Software Engineering** | [Certificate](#) Mar 2025
 - Gained knowledge of SDLC, Agile methodology, software testing, and development best practices.
